---

## EDUCATION

**FEDERAL UNIVERSITY OF AGRICULTURE, ABEOKUTA**

Bachelor of Science - Computer Science  
[March 2019] - [December 2023]

---

## SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, HTML, CSS
  - **Frameworks & Libraries:** React.js, Next.js, Tailwind CSS, Redux
  - **Tools:** Git, Firebase, REST APIs, Postman, Jest
  - **Soft Skills:** Problem-solving, Collaboration, Communication, Attention to Detail
- 

## WORK EXPERIENCE

**Frontend Developer - Tanta Innovatives**

[July 2024] - [January 2025]

- **Notary Signing Web Application:**
  - Developed meeting scheduling, digital signature, calendar, and sign-in pages, ensuring a seamless user experience.
  - Translated Figma designs into a modern, pixel-perfect UI, optimizing performance across different screen sizes.

- Implemented API integrations to connect backend services with frontend interfaces, improving system efficiency.
- **AI-Powered Fashion Web Application:**
  - Built and maintained a customer and vendor dashboard, integrating dynamic data and enhancing user interaction.
  - Implemented complex API integrations to facilitate real-time fashion recommendations and AI-powered analytics.
  - Converted Figma designs into a fully responsive and mobile-friendly modern UI.
- **Online Shopping Mall Web Application:**
  - Designed and implemented key UI components, including sidebar, navbar, cart system, wishlist component, and user profile pages, improving navigation and the shopping experience.
  - Developed both user and vendor aspects, ensuring smooth interactions for buyers and sellers.
  - Integrated multiple API services, optimizing data handling and improving performance.
- **All Projects:**
  - Ensured full responsiveness across different screen sizes, enhancing usability and accessibility.

## **Frontend Developer Intern - BlueChip Technologies**

[March 2022] - [June 2023]

- Gained hands-on experience in React.js, Next.js, and Tailwind CSS, laying the foundation for my current skill set.
- Worked as part of a team to debug and optimize legacy code for a major mobile communications operator, resolving critical UI issues and enhancing performance.
- Assisted in building and refining frontend components, improving application speed and user experience.

- Ensured cross-browser compatibility by testing and fixing UI inconsistencies across different devices and screen sizes.
  - Collaborated with senior developers to implement best practices in code quality, maintainability, and performance optimization.
- 

## PROJECTS

- **Book Reading Tracker:** Built a responsive and dynamic book reading tracker dashboard using Next.js, TypeScript, Tailwind CSS, and Firebase. The app organizes books into pending, active, and completed statuses, fetching data in real-time from Firestore. This project showcases my ability to create functional, visually appealing, and user-centered web applications.
    - **GitHub:** [Aweroro/book-reading-tracker](#)
    - **Live Site:** [Book Reading Tracker](#)
  - **Weather App:** Developed a Next.js weather application that provides real-time weather forecasts using the OpenWeatherMap API. Integrated user authentication with Auth0 (email/password & Google OAuth), allowing users to search weather conditions, save favorite locations, and receive personalized forecasts. Utilized Axios for API requests and Tailwind CSS for styling.
    - **GitHub:** [Aweroro/weather-app](#)
    - **Live Site:** [Weather App](#)
  - **Form Validation Site:** Created a form validation web app using React, TypeScript, and Tailwind CSS, implementing Formik and Yup for validation, authentication, and form submission. Ensured a seamless user experience with real-time input validation and a fully responsive UI.
